Managing Users

If your district uses Single Sign-On, user access and management may depend on that SSO connection.					
If you are not an Administrator in SST, you may not have access to manage users.					
If you are not an Administrat To manage users, click the <i>"Settings"</i> tab in the lefthand navigation menu.	or in SST, you may not have access to manage users. Transact C Dashboard C Dashboard C People C Activities C Organizations C Participation C Reports				
Creating a New Lloor	হিটুই Settings				
Click the <i>"Add User"</i> button on the Users page to create a new user.	Users Add User +				
Enter the new user's first name, last name, and email.	Account Information				
Click "Next Step"	First Name * Last Name *

	ijohnson@email.email				
	Next Step				

Choose the appropriate		
Security Role and		
Organization(s) from the		
dropdown menu.		

Tip: Users should only be granted access to the smallest entity they need. For example, if a user requires access to two schools, give them access to one. Then, grant access to the other using the "Add Another Access" link. The user should not be granted access to the entire district if they do not need to see student data from other school sites.

Click "Save User."

Edit Existing User To edit an existing user, click on the pencil icon to the right of their name. Adjust name information if needed. Then click *"Next Step."*
